CORE SKILLS

PHP 8 · Laravel 10+
React.js · JavaScript
MySQL · RESTful APIs
JWT · SSO · OpenSSL
RBAC · Data Security
Git · Agile / Scrum
Bootstrap · Tailwind
CodeIgniter · jQuery

DOMAIN

Fintech / NBFC
LOS (Loan Origination)
LMS (Loan Management)
Credit Risk Systems
Factoring Platforms
E-Commerce / CMS

API INTEGRATIONS

Karza — PAN Verification
CRIF — Credit Bureau
Corpository — Corp Data
Stripe · PayPal
YouTube Data API

EDUCATION

Diploma in Computer Sci.
Nanasaheb Mahadik Polytechnic
2021

CERTIFICATION

React: Scratch to Advanced
Mind Luster Platform · 2024

ACHIEVEMENT

 **Spot Award**
LOS delivery recognised by SBI
client

PROFILE

Full-Stack Engineer with 3.5+ years building production-grade financial systems for NBFC clients. Specialised in Laravel (PHP) back-end architecture and React front-ends, with hands-on delivery of a Loan Origination System (LOS) and Loan Management System (LMS) used by SBI Factors Limited. Proven ability to implement security-critical features OpenSSL encryption, RBAC, JWT/SSO and to integrate regulated third-party APIs (CRIF, Karza, Corpository). Currently leading a development team and collaborating directly with banking stakeholders on system logic and EOD/EOM financial calculations.

EXPERIENCE

Lead Full-Stack Engineer · SBI Factors Limited

Mumbai, India Dec 2025 – Present
[Laravel](#) [PHP 8](#) [MySQL](#) [React.js](#) [AJAX](#) [Bootstrap](#)

- Architected and shipped the Loan Management System (LMS) covering invoice booking, limit exposure management, and disbursement workflows for internal operations and external clients.
- Leading a cross-functional dev team: sprint planning, code reviews, stakeholder requirement translation, and on-time delivery of financial modules.
- Designed EOD/EOM financial calculation pipelines ensuring data accuracy for factoring operations zero tolerance for calculation drift in a regulated environment.
- Collaborating directly with business stakeholders to implement system logic that meets NBFC compliance requirements.

Software Engineer · Kritva Technologies (Client: SBI Factors)

Mumbai, India Jun 2024 – Nov 2025
[Laravel](#) [PHP](#) [MySQL](#) [OpenSSL](#) [CRIF API](#) [Karza API](#) [Corpository API](#)

- Built CRISIL-formula-based financial rating modules for the LOS translating complex credit-risk logic into validated, auditable back-end calculations.
- Integrated three regulated third-party APIs: Karza (PAN verification), CRIF (credit bureau reports), and Corpository (corporate data) — handling auth, error recovery, and data normalisation for each.
- Implemented OpenSSL-based encryption for all PII fields, enforcing data-security requirements across the LOS data layer.
- Implemented RBAC — role-based access control — to restrict sensitive financial operations by user role and permission scope.
- Received Spot Award from the client (SBI Factors) for critical contribution to the successful LOS go-live.

Web Developer · Noitavonne

Kolhapur, India May 2022 – May 2024
[Laravel](#) [CodeIgniter](#) [React.js](#) [REST APIs](#) [SSO](#) [Stripe](#) [PayPal](#)

- Designed and built RESTful APIs consumed by React.js SPAs — including auth flows, CRUD endpoints, and third-party payment gateway integrations (Stripe, PayPal).
- Implemented SSO (Single Sign-On) authentication for multi-product enterprise clients, improving security posture and user experience across platforms.
- Delivered multiple CMS and e-commerce projects end-to-end — from database schema through to frontend UI — within an agile team.
- Optimised site performance and SEO, measurably reducing page load times across client properties.

Web Developer Intern · Noitavonne

Kolhapur, India Nov 2021 – May 2022

- Built a CMS using CodeIgniter; developed interactive UI components with AJAX, jQuery, JavaScript, and CSS.

KEY PROJECTS

LOS — Loan Origination System · Laravel · MySQL · RBAC · OpenSSL · CRISIL Ratings

- Streamlined loan approval and KYC verification workflows, replacing manual processes.
- Implemented RBAC with granular permission scopes; OpenSSL encryption on all PII data fields.

- Deployed high-reliability financial rating engine using CRISIL formula logic.

LMS — Loan Management System · Laravel · MySQL · JavaScript · Early Warning System

- Built an Early Warning System (EWS) to proactively flag overdue invoices and recourse risk — a credit risk tool critical to NBFC operations.
- Designed Limit Exposure logic enforcing credit utilisation ceilings per client, debtor, and supplier — integrated into all invoice booking transactions.
- Implemented real-time monitoring dashboard with live financial metrics.

SiloCloud · Silo ERP · Silo OpenWorld · Laravel · CodeIgniter · React.js · SSO

- Delivered CMS, ERP, and e-commerce modules; integrated SSO authentication across the product suite.

YouTube Clone · React.js · Tailwind · YouTube Data API <https://youtubex-clone.netlify.app/>

- Responsive video platform with search, playback, and API-driven content — demonstrates React proficiency outside the fintech stack.

Thar Trek · React.js · Tailwind · <https://thartrek.netlify.app/>

- Developed an interactive and visually appealing user interface for the Thar Trek project using React.js
